Master of Business Administration

Broad Relevance, Unbound Opportunity

The MBA program helps equip working adults with the specialized skills and knowledge needed to transition to a career in the business arena or advance into a leadership role within their organizations. Rooted in theory and practice, our online MBA curriculum gives students a comprehensive foundation in core business areas as well as opportunities to apply that core knowledge to case studies and projects geared toward their workplaces and other organizations.

Concentrations available:

- project management
- finance
- organizational leadership
- supply chain management and logistics
- construction management
- energy management

Master of Arts in International Relations

Global View with Real-World Application

The Master of Arts in International Relations program equips students with a comprehensive understanding of the political, economic and cultural issues impacting the world, as well as core theories, underlying principles and practical strategies. These skills help you to prepare for a meaningful career working across the ever-changing international arena. Our program is designed for students from backgrounds including business, government and the military.

Concentrations available:

- international security
- national security
- international development
- cyber diplomacy
- regions of the world

Master of Arts in Diplomacy

Problem-Solving on an International Scale

The diplomacy program helps students build the knowledge and skills required to build cooperation, defuse tension, and promote peace between and among nations, groups, and other entities. Our curriculum explores international relations from a macro and micro perspective, beginning with a foundational examination of the political, cultural, and geographical complexity of the international environment.

Concentrations available:

- international terrorism
- international conflict management
- international commerce
- cyber diplomacy

Master of Science in Information Security & Assurance

Network and Building Business Strategies

This program helps working adults in the IT field develop the business acumen and management skills needed to pursue leadership positions. Our curriculum explores the technical theories and methods behind information security and assurance, best practices in information security technology, organizational structure and policy development, the regulatory environment, and management strategies.

Concentrations available:

- computer forensic investigation/incident response team management
- project management
- critical infrastructure protection and cyber crime
- vulnerability management
- cyber law and international perspectives on cyberspace

Master of Science in Leadership

Leading to Inspire

The leadership program helps aspiring and rising leaders hone their personal leadership styles and develop the specialized knowledge and skills needed to not just manage but inspire positive change within their organizations. Integrating leadership theory, analysis, and practice, our program curriculum provides students with a multidisciplinary framework for understanding and practicing their leadership skills.

Concentrations available:

- organizational leadership
- public sector/government/military leadership
- human resources leadership
- leading change management consulting

Master of Science in Executive Leadership

Reshaping the Future

Designed for senior leaders seeking a higher level of leadership learning, the Master of Science in Executive Leadership program provides leadership theory and application that addresses challenges that senior leaders regularly face. The values-based curriculum emphasizes the importance of strategic communications and emotional intelligence as critical components of leadership challenges.

Master of Science in Criminal Justice

Critical Skills for a Changing World

As criminal behavior on the global landscape becomes more complex, the need for adaptive and skilled criminal justice leaders is increasing. Our program is suited for working adults who are seeking the in-demand skills and knowledge needed to effectively work with foreign military and law enforcement on transnational crime issues.

Master of Arts in History

Lifelong Lessons from the Past

For nearly two centuries, Norwich University has played a vital role in U.S. history. Our program builds on our rich institutional history by analyzing the major developments, events, and figures of the past. Through this analysis, students cultivate a historiographical point of view that takes into account differing schools of historical thought, various research methods, and the limitations inherent in chronicling history.

Tracks available:

- world history
- American history

Master of Arts in Military History

Our Tradition, Our Expertise

The Master of Arts in Military History program reflects, honors, and extends Norwich's proud military heritage. Our rigorous military history graduate program provides an in-depth exploration of the role of the military and war throughout history. Our curriculum teaches students to navigate differing historical interpretations, synthesize diverse types of historical knowledge, and develop strong analytical abilities through intensive research and writing assignments.

Master of Public Administration

Serving and Leading Communities

The public administration program helps working professionals gain the knowledge and skills needed to not only help advance their careers but also make a greater difference in the communities they serve.

Concentrations available:

- public works and sustainability
- criminal justice and public safety
- fiscal management
- nonprofit management
- municipal governance
- international development and influence
- policy analysis and analytics
- public administration leadership and crisis management

Master of Arts in Strategic Studies

Peace is the Mission; Strategy is the Means

Designed for current and former military personnel of all uniformed branches, this program expands upon students' educational and military experiences to help them become better equipped to undertake the evolving mission of the United States military and to collaborate with agencies on matters of national security. The curriculum explores the relationship between politics and power: from the application of democracy to the use of military action and beyond.

Master of Civil Engineering

Leadership in the Field

As the first private college in the U.S. to teach civil engineering, Norwich has long been committed to the advancement and application of civil engineering. Our program honors that commitment by providing students with the knowledge and experience needed to assume leadership positions within their organizations or to run their own companies.

Technical tracks available:

- structural engineering
- environmental/water resources engineering
- geotechnical engineering
- construction management

Master of Science in Nursing

Thoughtful Leaders and Educators

Accredited by the Commission on Collegiate Nursing Education (CCNE), our online master's in nursing program equips working nurses with the skills needed to assume leadership positions. Students develop knowledge of health systems and essential skills in critical thinking, problem solving, research, evidence-based practice, communications, and management.

Concentrations available:

- healthcare systems leadership
- nursing education
- nursing informatics
