

RELAXONCHAIR MK-II PLUS

Experience RELAXONCHAIR where your tired, weary body can enjoy the most rejuvenating massage.

RELAXONCHAIR embodies affordability with exceptional quality. Our chairs feature top quality components and have several of the same features of top tier chairs that are almost twice the price.

Buttlock L-Track Massage System

- Designed with innovative rollers that conform to the spine's natural shape. Dual rollers glide from the upper back all the way down to under the seat towards the gluteus muscles to provide user with a full body massage. The L-Track innovation is especially beneficial for persons with lower back agony, have sore or tight glute muscles, or experience the ill effects of sciatica.

Deep Tissue Massage

- Designed to provide a deep, human-like massage throughout the body and provide a stretching function also referred to as the "spinal decompression" program.

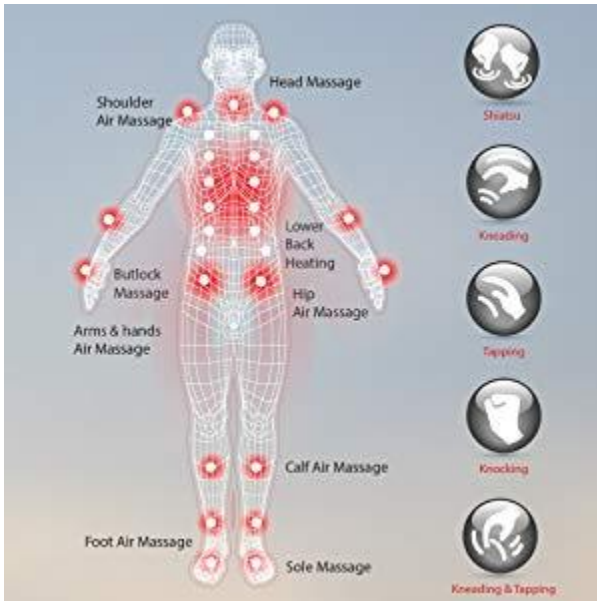

Quality & Affordability

- Enjoy a therapeutic massage from the comfort of your own home
- Our chairs include several, if not more, features than more expensive chairs so you don't have to spend a fortune for exceptional quality
- Every component of the chair is carefully selected and then meticulously tested before being placed on the market
- Our chairs are made of high-quality, soft-grained synthetic leather and thoughtfully designed with user friendliness in mind

Ease of Maintenance

- Save the hassle! Our chairs are simple and easy to install with no tools required (minimal 3-step process).

FULL BODY MASSAGE SYSTEM

Full Automatic Programs

- Features 4 fully Automatic Programs that are designed to mimic the actions of a professional massage therapist all throughout the body to provide a fully body stretching program.
- With vigorous air cells pinning your body in place, the chair moves you to a calculated routine, and slowly stretches out the leg and back muscles.

5 Manual Specific Targeted Massages

- Kneading, Tapping, Kneading + Tapping, Shiatsu, & Rolling.

Computerized Body Scan

- Built-in sensors automatically detect the length of the spine of the user to provide a more personalized, therapeutic massage. The scan allows the chair to precisely pinpoint where to massage and how to massage to enhance your experience.

FULL SIZE REMOTE CONTROLLER

One Hand Accessible Remote Controller

- Redesigned for a more stylish look that highlights its aesthetic appeal
- More accessible to operate with one hand for user convenience
- Large viewing screen to easily visualize what functions are activated
- User Friendly Design

ZERO GRAVITY, AIR MASSAGE, BACK HEATING

3 True Zero Gravity Positions

- Zero gravity elevates your feet to the same level as your heart, minimizing the strain of gravity on your vertebrae, relieving the discomfort of back pain. Your heart can work less and you can relax more.
- Our chairs are specifically customized to achieve TRUE zero gravity positions (up to 180° flat bed) so that your body weight is supported evenly throughout your body. Not only does zero gravity position take the pressure off your body, it can optimize blood flow throughout your entire body.

Air Massage Technology

- Uniquely designed airbags that are strategically located throughout the chair inflate and deflate independently to provide relief of muscle tension and a wonderfully soothing effect.
- Airbags are programmed to apply acupressure to shoulders, arms, hips, calves, and feet (3 levels of airbag intensity control).
- Features dual foot rollers located under the soles for reflexology.

Lumbar Back Heating

- Lumbar area of the back can be easily fatigued due to poor posture, constant movement and strain of muscles, or from lifting heavy objects.
- Features 2 heating pads located in lumbar area of the back to relieve tension and relax aching
